CaseId: CASE-20260103-d1e9d8b9
Issued on: 2026-01-03 03:22 (-05:00)

Forensic Document Examination Report: Cash Count Paperwork and Discrepancy Records

CONFIDENTIAL • LAW ENFORCEMENT SENSITIVE

RESPONDING UNIT Unit: _____ Badge: _____	REPORT DETAILS Report No.: doc_forensics_001 Date: 01-03-2026 03:22	CASE REFERENCE Case: CASE-20260103-d1e9d8b9 Classification: CONFIDENTIAL
--	---	---

CASE SYNOPSIS

Laboratory: Forensic Services Unit (Document Examination)

CLASSIFICATION DETAILS

Case Type	Cold Case Investigation
Priority Level	☐ Low ☐ Medium ☒ High ☐ Critical
Status	ACTIVE INVESTIGATION ☒ Active ☐ Under Review ☐ Closed
Lead Unit	Major Crimes Division

INCIDENT DETAILS

Incident Date	janvier 03, 2026
Incident Time	03:22 a.m. -05:00
Location	[Location from case data]
Reporting Party	[Officer Name] - Badge #[####]

SUBJECT INFORMATION

Name	[REDACTED]
Age	[##]
Sex/Race	[M/F] / [Race]
Last Known Address	[REDACTED]

INITIAL RESPONSE

First Responder: Officer [NAME], Badge #[####]
Arrived: 03:22 a.m. -05:00
Scene Secured: 03:37 a.m. -05:00

INCIDENT REPORT

Issued on: 2026-01-03 03:22 (-05:00)

Forensic Document Examination Report: Cash Count Paperwork and Discrepancy Records

CONFIDENTIAL • LAW ENFORCEMENT SENSITIVE

Laboratory and Case Information

Laboratory: Forensic Services Unit (Document Examination)

Case Reference: Internal investigation—cash count paperwork and discrepancy records

Report Date/Time (created): 2026-01-03T10:15:00-05:00

Scope: Examination of questioned cash count paperwork and related discrepancy records submitted as evidence items EV001, EV004, EV005, EV009, and EV010. This report documents observable document features and comparisons.

No conclusion about responsibility is made in this report.

Examiner Details

Examiner: Document Examiner (Forensic Services Unit)

Discipline: Forensic document examination (handwriting features, printing/production features, and alteration indicators)

Examination Location: Controlled lab workspace; evidence handled on clean surface with gloves when required.

Notes: All observations were recorded contemporaneously. Photographic documentation, where performed, was kept with the case file under the same case reference.

Evidence Description

- **EV001:** Cash count paperwork packet (multiple pages) submitted for examination.
- **EV004:** Discrepancy record(s) associated with cash totals.
- **EV005:** Additional cash-related record(s) (format consistent with count/discrepancy documentation).
- **EV009:** Supplemental paperwork (cash handling/count context).
- **EV010:** Supplemental paperwork (cash handling/count context).

Condition on receipt: Items were received in protected packaging. Pages showed routine handling wear (minor corner rounding and light smudging consistent with use). No destructive testing was authorized or performed.

Methodology

The following non-destructive procedures were performed as applicable:

1. Visual survey (unaided and magnified): Checked for overwriting, erasures, abrasions, ink pooling, and disturbed paper fibers.
2. Side-light inspection: Looked for impressions, indentation differences, and surface disruption consistent with erasure or scraping.
3. Ink/line assessment (comparative only): Compared relative ink tone and line quality across entries on the same page to identify potentially different writing instruments or writing times.
4. Numeral and handwriting feature comparison: Compared repeated numerals, letter forms, spacing, baseline habits, and pen pressure patterns within and across pages when similar entry types were present.
5. Sequence and completeness review: Checked for missing pages, inconsistent pagination, and mismatched form fields (e.g., totals not aligning with subtotals).

No chemical ink dating, ESDA processing, or destructive fiber testing was performed.

Forensic Document Examination Report: Cash Count Paperwork and Discrepancy Records

CONFIDENTIAL • LAW ENFORCEMENT SENSITIVE

Results

- Across **EV001**, several fields contained **numerical entries with differing line quality** (e.g., one set appearing darker/heavier and another lighter/finer) within the same document set. These differences are **consistent with use of different writing instruments and/or separate writing events**, but are not, by themselves, proof of alteration.
- In **EV004** and **EV005**, at least one total or subtotal field showed **localized overwriting/correction behavior** (e.g., re-traced numerals and tightened loops) compared to surrounding entries. Under magnification, the corrected areas showed **increased ink density** relative to adjacent writing.
- On select pages within **EV001** and **EV009**, there were **minor surface disturbances** near corrected numerals (consistent with light erasure or rubbing). The disturbances were limited in size and not present uniformly across the page.
- The layout and printing of the forms within **EV001** appeared **consistent within the packet** (similar font and alignment), with no obvious indications of page substitution detected during this examination.
- No clear evidence of cut-and-paste assembly, page splicing, or mechanically removed sections was observed on the submitted originals.

All observations above are limited to the submitted items and their condition at the time of examination.

Interpretation

The observed differences in ink appearance and the presence of corrections in **EV001**, **EV004**, and **EV005** indicate that some entries were likely completed at different times and/or with different writing instruments. Minor surface disturbance near certain corrected numerals supports the possibility of light erasure or rubbing prior to rewriting.

These findings support that the paperwork includes edited or corrected entries rather than being uniformly "single-pass" writing. However, this examination does not determine who made any entry, when (beyond relative sequencing), or whether any correction was authorized. No opinion is offered regarding intent or responsibility.

Chain of Custody

- **2026-01-03T09:40:00-05:00**: Evidence items **EV001**, **EV004**, **EV005**, **EV009**, **EV010** received by Forensic Services Unit evidence intake; packaging inspected and logged.
- **2026-01-03T09:55:00-05:00**: Items transferred from evidence intake to Document Examination bench storage (sealed when not in use).
- **2026-01-03T10:05:00-05:00**: Items released to the assigned examiner for controlled laboratory examination.
- **2026-01-03T10:50:00-05:00**: Examination concluded; items returned to Document Examination bench storage and resealed.
- **2026-01-03T11:00:00-05:00**: Items returned to evidence intake for continued case custody.

All transfers occurred within secure areas. No evidence processing beyond non-destructive examination was conducted.

Limitations

- This report is limited to the submitted evidence items (**EV001**, **EV004**, **EV005**, **EV009**, **EV010**) and their condition on receipt.
- Visual and comparative methods can identify indicators consistent with correction or rewriting but **cannot**, on

their own, establish author identity** or intent.

- No chemical ink dating or advanced impression development was performed; therefore, results do not address absolute timing of entries.
- Photographic documentation and contemporaneous notes reflect conditions at examination time and may not capture all microscopic features present.
