

Staff Clock-In/Out & Breaks Report

Overnight shift coverage around incident window (2026-05-10)

Layout: AccessLog

Case Ref	case_rookie_demo3
Incident Date/Time	2026-05-10T03:18:00-07:00
Exhibit Ref	asset.staff_shift_and_clock_report
Custodian	Diner timekeeping system (manager export)
Location	Eugene, Oregon
Generated By/At	Case file intake · 2026-05-10T09:05:00-07:00
Document Type	Network / Server Access Log

SUMMARY

- Export reflects timeclock and recorded breaks for staff on duty during the overnight period.
- All times are local (America/Los_Angeles) and rounded to the minute per system settings.
- Purpose: corroborate presence and identify any unlogged absence overlapping the 03:18 incident window.

TIMEKEEPING EVENTS (CHRONOLOGICAL)

Timestamp	Source IP	Method	Path	Status
2026-05-10T00:02:00-07:00	N/A	POST	timeclock/clock-in	Mara Kline (Night-shift server)
2026-05-10T00:05:00-07:00	N/A	POST	timeclock/clock-in	Derek Holt (Overnight line cook)
2026-05-10T02:12:00-07:00	N/A	POST	timeclock/break-start	Derek Holt (recorded short break)
2026-05-10T02:22:00-07:00	N/A	POST	timeclock/break-end	Derek Holt (returned from break)
2026-05-10T04:58:00-07:00	N/A	POST	timeclock/clock-out	Derek Holt
2026-05-10T05:11:00-07:00	N/A	POST	timeclock/clock-out	Mara Kline

No additional clock-in/clock-out entries appear between 01:30 and 04:30 besides the events shown. The 03:18 incident time falls between recorded entries; continuous presence must be corroborated with camera/POS activity.

RELEVANCE TO 03:18 WINDOW

At 03:18, both Mara Kline and Derek Holt are clocked in with no recorded breaks spanning the incident time. The report does not independently prove physical location within the premises during that minute; it is used to rule out off-shift absence and to align with POS/camera evidence.
