Cashier/operator labels reflect POS export fields as received; correlate with staff schedules and other exhibits (e.g., office landline call log) for attribution.

NOTES FOR CORROBORATION

- Activity indicates ongoing POS use before and after the reported 03:18 incident time.
- Closeout functions appear later in the window, supporting a defined closeout period.
- This exhibit should be cross-checked against the office landline call log and incident statement for claimed office presence during the entry window.
