

Back Lot / Rear Door Camera — Still Frame Compilation

Rear exterior camera snapshots bracketing the reported forced-entry time (incidentDate 2026-05-11 03:18 PT)

Layout: ForensicReport

Case Reference	case_rookie_hardened
Exhibit Reference	asset.back_lot_camera_stills
Location	Back lot / rear door area, Eugene, Oregon
Source System	Diner rear-lot CCTV (fixed exterior camera facing rear door)
Incident Date/Time Anchor	2026-05-11T03:18:00-07:00
Case Opened	2026-05-11T09:05:00-07:00

SUMMARY

This exhibit is a PDF compilation of still frames captured from the diner's rear-lot/rear-door camera during the period surrounding the reported break-in (incidentDate 2026-05-11 03:18 PT). Frames are intended for time anchoring (who/what appears near the rear door) and comparison to interior scene evidence (door damage, threshold marks) and staff/customer alibis.

EXTRACTION NOTES (AS PROVIDED WITH EXHIBIT)

Coverage Window (intended)	Approx. 2026-05-11 03:10–03:30 PT (bracketing 03:18 PT)
Time Basis	Camera overlay timestamps (local PT). Verify camera clock drift against POS/dispatch time if discrepancies arise.
View	Rear door threshold and immediate back-lot approach area; partial view of service corridor exterior.

FRAME INDEX (PLACEHOLDERS FOR PDF PAGES)

PDF Page	Overlay Time (PT)	Observed Activity (brief)	Relevance
1	2026-05-11 03:10	Rear door area baseline / no obvious activity noted in still	Establishes pre-incident conditions
2	2026-05-11 03:14	Back-lot approach area visible / check for any person or vehicle presence	Pre-incident movement check
3	2026-05-11 03:17	Rear door area immediately before incident anchor	Last pre-03:18 reference
4	2026-05-11 03:18	Incident-time anchor frame; examine door position, shadows, and any subject silhouette	Primary timing reference
5	2026-05-11 03:19	Immediate post-anchor frame; examine for subject departure direction	Post-incident movement
6	2026-05-11 03:22	Back-lot area / rear door status check	Follow-on activity
7	2026-05-11 03:27	Back-lot area; check for returning staff or customer presence	Late-window corroboration
8	2026-05-11 03:30	End-of-window reference frame	Confirms whether scene stabilizes

Row entries reflect the intended indexing of stills within this PDF exhibit. Exact page count/timestamps should be confirmed directly from the attached PDF

prior to testimony or definitive time assertions.

ANALYST ATTENTION

- *If a subject is visible: note clothing, gait, and direction of travel for comparison against staff attire and interior floor/threshold marks.*
- *If the rear door appears already ajar before 03:18: treat as potential indication of an inside/outside coordination or earlier access.*
- *Confirm camera timestamp accuracy by cross-referencing any known time event (e.g., vehicle headlights in lot matching another camera, or a documented register receipt time shortly after 03:20).*
